Enforced TLS/SSL connection

TLS/SSL is enforced on the server by default. You can download the SSL public certificate from the above menu. To disable SSL, please update the `require_secure_transport` server parameter to OFF. You can also change the TLS version by updating the `tls_version` server parameter. [Learn more](#)

Public access

☒ Allow public access to this resource through the internet using a public IP address

Firewall rules

Inbound connections from the IP addresses specified below will be allowed to port 3306 on this server. [Learn more](#)

Some network environments may not report the actual public-facing IP address needed to access your server. Contact your network administrator if adding your IP address does not allow access to your server.

☐ Allow public access from any Azure service within Azure to this server

+ Add current client IP address (103.85.93.139) + Add 0.0.0.0 - 255.255.255.255

--------------------	------------------	----------------

Welcome to MySQL Workbench

MySQL Workbench is the official graphical user interface (GUI) tool for MySQL. It allows you to design, create and browse your database schemas, work with database objects and insert data as well as design and run SQL queries to work with stored data. You can also migrate schemas and data from other database vendors to your MySQL database.
